

**G1 CONSULTING
CO.**
Creating something from nothing

--> **Competitive position:** HKUST's channel is ranked in the middle among the five major HK universities, in the measures of 1) Average Duration 2) Average Likes 3) Average Views and 4) No. of Videos. We clearly see rooms for improvement.

--> **Key Contributing factor:** There is a stronger correlation between likes and views for longer videos. With that said, short videos remain important due to relatively higher average views across all channels.

Views and Likes by Video Length

Legend:

- Long (10-20mins)
- Medium (5-10 mins)
- Short (1-5 mins)
- Very Long (20+ mins)
- Very Short (Less than 1 min)

The scatter plot shows that while most videos have fewer than 100K views and fewer than 500 likes, there is a notable outlier for 'Short (1-5 mins)' videos with approximately 100K views and 1000 likes. The trend line indicates that as the number of views increases, the number of likes also tends to increase, though the relationship is not perfectly linear.

[illegible]

Key takeaways on Word Cloud: Top long videos are more academically oriented, whereas top short videos are quite diversified with more promotional focus.
